

INBRED MAIZE LINE PHB1V

Abstract

A novel inbred maize line designated PHB1V and seed, plants and plant parts
5 thereof. Methods for producing a maize plant that comprise crossing inbred
maize line PHB1V with another maize plant. Methods for producing a maize
plant containing in its genetic material one or more traits introgressed into
PHB1V through backcross conversion and/or transformation, and to the maize
seed, plant and plant part produced thereby. Hybrid maize seed, plant or plant
10 part produced by crossing the inbred line PHB1V or an introgressed trait
conversion of PHB1V with another maize line. Inbred maize lines derived from
inbred maize line PHB1V, methods for producing other inbred maize lines
derived from inbred maize line PHB1V and the inbred maize lines and their parts
derived by the use of those methods.
